

COMPLIMENT YOUR PRODUCTS WITH OUT STEP DISPLAY STANDS

Our step displays will help to compliment your products bringing items closer to the customer's eye level and enabling more products to be effectively displayed in the same space.

Step displays are a simple, flexible and very rugged solution, manufactured from the same steel and employing the same construction techniques as those used in making our renowned market stalls.

The displays are designed to be flat packed and easily transportable by simply detaching the back leg from the step. They are a stand-alone fabrication that could be used on any market stall, table or flat surface. By spacing the supports further apart the display lengths can be varied providing greater flexibility. Any suitable board can be used to form the steps, this is then usually covered with a cloth or grass matt to form a backdrop for your products.

**◀ 9" x 9" 2 step display****TYPICAL USES**
